

Therapeutic Laser

Laser therapy provides a sterile, **pain-free, surgery-free, drug-free treatment** which is used to treat a variety of injuries, wounds, fractures, neurological conditions, numerous dermatological problems, and pain. Whether your pet is rehabilitating from trauma or injury, healing from wounds, or simply aging, your companion will benefit from this revolutionary new approach to Veterinary medicine.

Laser therapy is the only course of treatment that actually stimulates the body to heal from within. Non-thermal photons of light are administered to the body and absorbed by the injured cells. The cells are then stimulated and respond with a higher rate of metabolism. This results in increased circulation in the body, an anti-inflammatory reaction, relief from pain and an acceleration of the healing process.

Where can Therapeutic Laser Help?

Fort Washington, MD 20744
